DETAILED ACTION

Allowable Subject Matter

Claims 1-16 allowed.

Claims 1,7, and 11 are allowable because the prior art of record fails to teach, in combination with other claim limitations,

an interpolation unit coupled with said fast Fourier transforming unit, for interpolating said pilot signals in a time-axis direction and a frequency-axis direction to calculate reference signal vectors of said carriers in which said pilot signals are not inserted; a control unit coupled with said interpolation unit, for changing frequency band characteristics of said interpolation unit.

an interpolation circuit for interpolating said pilot signals extracted from said received signal in said time-axis direction and said frequency-axis direction to calculate reference signal vectors of carriers in which pilot signals are not inserted.

a filter circuit for limiting a frequency band width of said pilot symbols extracted from said received signal and arranged in said time-axis direction; and a frequency-axis direction interpolation circuit for interpolating said pilot signals from said filter circuit in the direction of said frequency axis of each symbol to produce reference signal vectors of carriers in which said pilot signals are not inserted.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zewdu Habte whose telephone number is 571-272-3115. The examiner can normally be reached on 8:30-5:00.
